

## **Amendments to the Specification:**

*At page 1, line 3 please add the following heading and subheading as shown below:*

### **BACKGROUND OF THE INVENTION**

#### **1. Field of the Invention**

*At page 1, line 8, please add the following subheading as shown below:*

#### **2. Description of the Related Art**

*At page 4, line 3, please add the following subheadings and paragraph as shown below:*

### **SUMMARY OF THE INVENTION**

These and other objects are achieved by the preparation of non-phase-separated organosilicon copolymers by copolymerizing one or more vinyl ester monomers with functional organopolysiloxanes having less than 15% non-functional molecules and a majority of functional molecules with two functional groups, in mixture of at least two non-aqueous solvents, where one solvent has a transfer coefficient greater than  $20 \times 10^{-4}$  with respect to vinyl acetate.

### **DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT(S)**

*Please amend the paragraph (section) beginning on page 28, at line 1, as shown below:*
